Application/Control Number: 10/673,018

Art Unit: 3617

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "comprises", "means", and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The disclosure is objected to because of the following informalities:
 Paragraph 00011 is a copy of the claims. Claim language should not be relied upon to describe the invention.

Appropriate correction is required.

Claim Objections

3. Claim4 is objected to because of the following informalities: The second period (.) should be removed from the last line of the claim for grammatical clarity. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Application/Control Number: 10/673,018

Art Unit: 3617

3.

5. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite due to the fact that it is unclear how the inner surface of the valve cover is spaced "closely apart" from the end face portion, as set forth in line 6. No directional reference (i.e. radially, axially, etc) has been set forth to describe where the valve cover inner surface is located with respect to the end face portion.

Claim 2 is indefinite due to the fact that it is unclear what element of the invention is being referred to as having "one end" and "the other end" as set forth in lines 2-3 of the claim. It is unclear whether a specific element of the invention or the vent plug in general is being referred to as having the limitations mentioned immediately above.

Claim 10 is indefinite due to the fact that it is unclear how the shroud is "closely spaced" from the axially outer end face portion. No directional reference (i.e. radially, axially, etc) has been set forth to describe where the shroud is located with respect to the end face portion.

Allowable Subject Matter

6. Claims 1-10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 3617

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references are considered to show vent plugs for hubcaps having an air valve capable of relieving pressure within the hub. For example, Isenbarger shows a vent plug of the type described above.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason R Bellinger whose telephone number is 703-308-6298. The examiner can normally be reached on Mon - Thurs (9:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Morano can be reached on 703-308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
